

Superior Performance and Effortless Scale, With NTT-Netmagic.

01. NTT-Netmagic Hybrid Services

02. NTT-Netmagic Managed Services

03. DR for GCP workloads

04. Expertise on Google Cloud

05. Cloud Analytics &
Performance capabilities

06. Cloud Connectivity using
Partner Interconnect

07. Simpli ODB service for Oracle
workloads with Google Cloud

01. NTT-Netmagic Hybrid Services

We combine the GCP public cloud with our ability to provide bare-metal infrastructure, co-location services and private cloud deployment to help businesses deploy their workload on any combination based on the application demands of compliance, performance or licensing.

02. NTT-Netmagic Managed Services

For many businesses, a qualified Managed Services Provider makes all the difference. From hands-on support to ongoing operation of workloads, NTT-Netmagic offers a catalog of project-based and managed services.

NTT-Netmagic is premier partner for Google cloud Platform to sell GCP infrastructure and provide managed service along with it. We have right skill-set & capabilities to help you to accelerate your Google cloud journey by ensuring full visibility, policy enforcement and other security control's in place to ensure infrastructure is future proof and threat free. we follow standard industry recommended practices during various stages i.e solution's, migration and operations life-cycle of your google cloud infrastructure which can be Hybrid and multi-cloud workloads as a single partner of choice.

03. DR for GCP workloads

Run your primary workloads in Google cloud with choice to set up DR site across 10 Data centers of NTT-Netmagic across India using public Internet, VPN or dedicated partner interconnect connection. Which gives NTT-Netmagic ability as a single provider to manage your entire DC-DR workloads including connectivity

04. Expertise on Google Cloud

Industry Solutions Enabled by GCP

NTT-Netmagic solution approach follows best practices recommended by GCP, NTT-Netmagic uses right set of tools, templates and processes, which helps clients leverage IT modernization with Google cloud Tools, templates, and industry solution best practices to help clients leverage modular and modern platforms.

Netmagic have 30+ Google cloud certified engineers, who helps to ensures that solution is designed by following Google recommended standard processes, right set processes & tools are used for greenfield and brown-field deployments.

Cloud Transformation & Migrations

NTT-Netmagic have a portfolio and capabilities to help you in your end-to-end cloud transformation journey, from consult, design, migration and managing operations cycle for your entire IT infrastructure.

Security on GCP

NTT-Netmagic follows stringent security practices to ensure security is set at its best, which helps you to reduce risk and accelerate your cloud adoption on Google cloud Platform, with dedicated team who takes care of your security landscape on GCP and other workloads across on-premises and other cloud.

SAP on GCP

NTT-Netmagic is SAP certified partner for SAP Hosting, Cloud and Infrastructure Operations and SAP HANA operations services with many happy customers with SAP workloads in hybrid environment. our unique ability to manage SAP infrastructure in hybrid environment helps us to fast track SAP migrations, speed up greenfield deployments, from few weeks to few days.

NTT-Netmagic helps you in cloud hosting of applications, SAP product license and support, custom solution, Installation, migration and implementation support along with managed services for operations lifecycle.

Data Centricity and Analytics on GCP and Desktop as a Service Solution

Unlock your data and re-imagine your business with Google cloud's fully managed analytic platform, which empowers your business while eliminating constraints of scale, performance and cost.

Our "Desktop as a Service" offering with Google cloud helps you to deploy and use desktops in google cloud in few minutes with much lower cost, reduced TCO, fully secure and can be accessible from any device and anywhere with unparalleled user experience without any GCP skill-set.

05. Cloud Analytics & Performance capabilities

NTT-Netmagic has invested in skills and tools that enable customers to optimize resources and costs across public clouds. Our Simpli-Insight service in partnership with VMware CloudHealth provides real time access to managed multi-cloud workloads. Further, our partnership with AppDynamics provides customers' with the ability to manage application performance across different cloud environments and end user devices. By leveraging this capability, customers can proactively remove bottlenecks and ensure seamless experience for end users.

06. Cloud Connectivity using Partner Interconnect

NTT-Netmagic's Cloud Connect service offers secure connectivity to Google cloud using Partner Interconnect over layer-2 connection, ensuring stringent network performance, latency and availability SLA.

Using cloud connect service, customer can connect their hybrid and multi-cloud workloads.

07. Simpli ODB service for Oracle workloads with Google Cloud

SimpliODB is an architecture driven hybrid cloud service delivering high performance pool of compute and storage resources for Oracle DB hosting.

It is fully managed service leveraging GCP services on a high speed interconnect.
